Overview

With over 40 years experience in Sauna Cabin manufacturing we pride ourselves on bringing our customers fantastic quality saunas at affordable prices.

Sauna cabins provide a haven of tranquillity, a place to unwind, cleanse your body and refresh your mind. We offer a range of cabins from one person domestic saunas up to 14 seat commercial models.

Use a spare room or convert a garage or loft, most models can be tailored to customer sizes and are available with full or partial glass front or sides, please contact our technical advisors.

Commercial Infrared Sauna IR4030

Vision Finnish Sauna V2020

Traditional Finnish Sauna D2030

All cabins come complete with a full height safety glass door, benches, a traditional rock sauna heater, accessories, fittings, installation instructions and a user guide. Upgrades for sauna heater and digital controls are available for all sized models.

Constructed from only the finest quality timber sourced from trusted merchants with FSC and PEFC certification, all of our cabins are designed for easy installation, no plumbing or drainage, plastering or building work, all that is required is a space that leaves a 25mm air gap all around the cabin and a suitable electrical power supply. All Oceanic sauna heaters are CE tested by the independent testing house Nemko .

Commercial and Home sauna cabins are supplied direct and can be delivered to anywhere in Europe.

Bespoke Projects

Oceanic

Traditional Finnish Home Saunas

We are able to offer an almost limitless range of sauna cabins all derived from a simple combination of full and half width panels. The door mounted in it's frame is the same size as a panel and entirely simetrical, hence it will fit anywhere in the cabin layout and open to the left or right. In many cabins it is possible to have more than one bench layout, we are happy to advise on individual circumstances. If the size of the cabin you require is not shown in our standard price list please enquire with our sales office as additional sizes can be obtained by altering configurations.

- Thermometer
- Towel & Fragrance rack
- Lighting
- Instructions and manuals
- All trim timbers and fixings

Celebration Lamp and Shade

Heater Guard and Rocks

Bucket & Ladle, Thermometer, Sand Timer

Towel & Fragrance Rack

Oceanic

We offer a choice of Celebration or Delux specification Sauna Cabins, the major difference in these two specifications is the timber used for the benches, back rests, head rests, floor mats and heater guard

Celebration

Our Celebration saunas are our most popular and cost effective specification, they feature kiln dried Finnish Spruce timber for the benches, backrests, floor mat and heater guard. this timber has small knots dotted throughout which fits well with the panel claddings. The lighting provided is a sauna lamp and wooden shade which gives the cabin a more relaxing atmosphere with its lower lighting.

Deluxe

For those seeking extra style and comfort, our Deluxe specification offers an upgrade to the Abachi timber for the benches, backrests, floor matt and heater guard. The backrest has been given an additional slat and is ergonomically curved for user comfort. Abachi timber is knot free hardwood with an attractive appearance; it is selected for use in saunas due to its low thermal conductivity, reducing the need for use of towels in the cabin. The lighting provided is low voltage spot lights which give a brighter more modern feel to the cabin.

Safety Glass Door

A full height clear glass door constructed from tempered safety glass, featuring modern polished chrome hinges and matching Ash and polished chrome handle with a magnetic catch.

Oceanic

Built in Controls Heater

Oceanic wall mount heater for home use with digital controls for time and temperature are incorporated into the base of the unit. 1.5 hour timer with automatic high temperature safety cut off. Suitable to single or three phase connection (4.5 - 6kw units)

ADVANTAGES:

- Only requires one cable to the heater from isolated mains supply
- No additional keypad required
- All in one cost effective option

OCSB External Digital Controls Heater

For the most reliable, accurate and quickest heating of your sauna our simple to use OCSB control system is the best solution. Control the time, temperature, lighting and fan from the easy to use keypad that can be mounted up to 10m from the main control box, typically on the front of the cabin. Heavy duty relays sequentially switch the elements to ensure accurate and efficient control of the internal sauna temperature which is measured by a wall mounted temperature sensor.

ADVANTAGES:

- Remote keypad makes it easier to activate and control the heater
- Heavy duty relays and sequential switching for prolonged life of heater
- Higher temperatures can be reached with the internal temperature sensor
- Faster heat up time
- Lighting and fan can be switched via the keypad

Wall mount sauna heater

OCSB duty control box

OCSB b duty controller

EOS Heater + OCSB Controls

A wall mounted Finnish style sauna heater made in Germany by EOS these feature in the light duty traditional sauna cabins.

Advantages:

- long life incoloy heating elements,
- scratch resistant anthracite powder coating with a pearl effect finish
- a die-cast aluminium top,
- designed for fast heat-up times and powerful water infusions.

Floor standing heater

Oceanic Floor Standing heater with OCS-B controls is available in 3 sizes: 9kw, 12kw and 15kw, low voltage control panel and high voltage control box. Must be wired three phase.

ADVANTAGES:

- Built for heavy duty use
- Stainless Steel shell
- Large 25kg rock basket
- Long life incoloy elements

Behind the bench heater

The Oceanic behind bench heater with OCS-B controls is a wall mounted unit that is located behind a false wall at the rear of the cabin. There are many advantages of this model of heater

ADVANTAGES:

Built for heavy duty use

Protected heating elements

Rocks do not come into contact with heating elements

Drip and evaporation trays control the water dosing. This prevents water being splashed directly onto the elements which is a common cause of element failure in standard sauna heaters.

A water dish and hose are fitted with the behind bench heater, users pour water into this dish mounted behind the false wall and the water is distributed evenly across the rocks.

Safer to use - prevents any accidental injuries from users being able to come into contact with the hot surfaces of the heater

More energy efficient

Oceanic

Optional Extras

We offer a variety of optional extras that can be added onto the sauna cabin, these are not essential for functionality of the sauna however they may improve user experience.

Glazing

It is becoming increasingly popular to specify glazed panels in the sauna. We offer a choice of half and fully glazed panels. Please speak to a member of the sales team if you are interested in glazing panels.

Herb Bowl

The herb bowl hangs above the sauna heater, as it steadily steams it provides an increase in the cabin humidity. Users can mix raw essential oils, fresh herbs, citrus fruits or even Himalayan salts with the water in the bowl to add a new dimension to the bathing experience

Speakers

Playing music in the sauna cabin can add to the relaxation experience. It is possible to add speakers at low level in the traditional sauna cabin

Waterproof IP65 120 °c Speakers

Bench infills and Lighting

Boxing in the benches with bench infills offers an aesthetic improvement to the cabin, often customers opt to have below bench lighting in conjunction with the bench infills as they produce a more subdued and relaxing ambience.

Chromatherapy

Boxing in the benches with bench infills offers an aesthetic improvement to the cabin, often customers opt to have below bench lighting in conjunction with the bench infills as they produce a more subdued and relaxing ambience.
