Oceanic

Overview

With over 40 years experience in Sauna Cabin manufacturing we pride ourselves on bringing our customers fantastic quality saunas at affordable prices.

Sauna cabins provide a haven of tranquillity, a place to unwind, cleanse your body and refresh your mind. We offer a range of cabins from one person domestic saunas up to 14 seat commercial models.

Constructed from only the finest quality timber sourced from trusted merchants with FSC and PEFC certification, all of our cabins are designed for easy installation, no plumbing or drainage, plastering or building work, all that is required is a space that leaves a 25mm

Traditional Finnish LD C3040 Floor Standing

Traditional Finnish HD Sauna HD3030 Floor Standing

air gap all around the cabin and a suitable electrical power supply. All Oceanic sauna heaters are CE tested by the independent testing house Nemko.

Commercial and Home saunas are supplied direct and can be delivered to anywhere in Europe.

Bespoke Commercial Projects

Oceanic

Traditional Finnish Light Duty Commercial Saunas

Our light duty commercial sauna cabins are suitable for use in smaller, less heavily frequented spas and gyms.

Each light duty commercial sauna is supplied complete with: A EOS sauna heater with OCSB digital remote controls and 15kgs sauna heater rocks.

Reinforced 5 slat benches with supports, an extra duty base which lifts the walls panels off the floor, back rests, slatted floor mat (all supplied flat packed),

A modern full height safety glass door with polished chrome & Ash wood handle and polished chrome hinges, heater guard, towel and fragrance rack, four 125ml bottles of Saunaroma (Lavender, Eucalyptus, Rosemary, Orange) headrests, traditional water bucket with liner and sculpted ladle, sand timer, thermometer, and lighting. Assembly instructions, caution plate, operation and maintenance manual, water resistant bathing rules card and all fitting and fixings.

All panels are fully insulated with 50mm of rockwool fibre, and are clad on both the exterior and interior faces allowing the cabin to be assembled free standing in almost any location without the need for brickwork, plastering or fixing to walls .

The door mounted in its frame is the same size as a panel and entirely symmetrical allowing its position on the to be readily interchanged, though the door must for safety reasons be opened outward it can be hinged either left or right.

C3030 Light Duty Sauna Cabin

In many cabins it is possible to have more than one bench layout, we are happy to advise on individual circumstances.

Product Features

EOS HEATER + OCSB CONTROLS

A wall mounted Finnish style sauna heater made in Germany by EOS, features long life incoloy heating elements, scratch resistant anthracite powder coating with a pearl effect finish, and a die-cast aluminium top, designed for fast heat-up times and powerful water infusions. For the most reliable, accurate and quickest heating of your sauna our simple to use OCSB control system is the best solution. Control the time, temperature, lighting and fan from the easy to use keypad that can be mounted up to 10m from the main control box, for example behind a reception desk or in a plant room.

EXTRA DUTY BASE

We have increased the size of the base of the sauna making it more robust and lifting the panels off the ground providing a little more cabin height, lifting the wall panels off the ground also protects them from any water laying on the ground prolonging the life of the sauna.

REINFORCED BENCHES

A double wall frame beneath the bench strengthens and reinforces, accommodating for the toll of additional bathers.

Light Duty Commercial Base

Domestic Base

Oceanic

We offer a choice of Standard or Delux specification Sauna Cabins, the major difference in these two specifications is the timber used for the benches, back rests, head rests, floor mates and heater guard

Celebration

Our Celebration saunas are our most popular and cost effective specification, they feature kiln dried Finnish Spruce timber for the benches, backrests, floor mat and heater guard. this timer has small knots dotted throughout which fits well with the panel claddings. The lighting provided is a sauna lamp and wooden shade which gives the cabin a more relaxing atmosphere with it lower lighting.

Deluxe

For those seeking extra style and comfort, our Deluxe specification offers an upgrade to the Abachi timber for the benches, backrests, floor matt and heater guard. The backrest has been given an additional slat and is ergonomically curved for user comfort. Abachi timber is knot free hardwood with an attractive appearance; it is selected for use in saunas due to its low thermal conductivity, reducing the need for use of towels in the cabin. The lighting provided is low voltage spot lights which give a brighter more modern feel to the cabin.

Safety Glass Door

A full height clear glass door constructed from tempered safety glass, featuring modern polished chrome hinges and matching Ash and polished chrome handle with a magnetic catch.

Oceanic

Traditional Finnish Heavy Duty Commercial Saunas

The heavy duty range of saunas are built for commercial use and include a number of features that will reduce maintenance, running costs and prolong the life of the cabin.

Double Insulated Wall Panel

All wall panels are filled with Rockwool and lined with an aluminium sheet to provide two layers of insulation improving efficiency, reducing the energy requirements and prolonging the life of the heater.

The base is treated with a water resistant tanking solution so that the cabin does not absorb water when the floors are cleaned with mop and bucket.

The hidden nail profile of the knot free spruce panels creates a clean flawless internal finish to the cabin.

Thicker bench timber

25mm thick Spruce timber is used in the heavy duty range to give a more durable and stronger benches.

Disabled Access Safety Glass Door

A full height clear glass door constructed from tempered safety glass, 940mm in width to allow for wheelchair access.

Floor standing heater Models

Oceanic Floor Standing heater with OCS-B controls is available in 3 sizes: 9kw, 12kw and 15kw, low voltage control panel and high voltage control box. Must be wired three phase.

ADVANTAGES:

- Built for heavy duty use
- Stainless Steel shell
- Large 25kg rock basket
- Long life incaloy elements

Oceanic Floor Standing Heater

Heatproof Panel with optional slate mosaic wall

Floor standing heater

Air vent panel

Heavy Duty Cabin Section

Cool air is drawn in from beneath the heater through the vent panel behind. The hot air circulates by rising up to the ceiling then falling down through the benches.

Heat resistant panels

To avoid scorching of the timber panel behind the heater unit all heavy duty cabins are supplied with heat resistant panels.

Behind Bench Heater Models

Behind Bench Heater

An option for all heavy duty cabins is the behind bench heater, a wall mounted unit that is located behind a false wall at the rear of the cabin. There are many advantages of this model of heater.

Protected heating elements

The heating elements are located directly beneath the rock tray in the behind bench heater. This prevents water being splashed directly onto the elements which is a common cause of element failure in standard sauna heaters.

A water dish and hose are fitted with the behind bench heater, users pour water into this dish mounted behind the false wall and the water is distributed evenly across the rocks. Water thrown behind the bench will also be collected by the rock tray and will never fall directly onto the elements.

Safer Use

Having the heater hidden out of the way behind a false wall and beneath the benches prevents any accidental injuries from users being able to come into contact with the hot surfaces of the heater itself.

Auto dosing

It is simple for this model of sauna heater to be fitted with an auto dosing pump to control the amount of water being added to the rocks remotely and prevent the need for users to interfere with the heater. This further prolongs the life of the heater and provides the client with better management of the conditions within the sauna.

Heavy Duty Cabin Section

Cool air is drawn in from beneath the heater through the vent panel behind. The hot air circulates by rising from above the false wall then falling down through the benches.

Behind the bench heater

The Oceanic behind bench heater with OCS-B controls is a wall mounted unit that is located behind a false wall at the rear of the cabin. There are many advantages of this model of heater

ADVANTAGES:

- Built for heavy duty use
- Protected heating elements
- Rocks do not come into contact with heating elements
- Drip and evaporation trays control the water dosing. This prevents water being splashed directly onto the elements which is a common cause of element failure in standard sauna heaters.
- A water dish and hose are fitted with the behind bench heater, users pour water into this dish mounted behind the false wall and the water is distributed evenly across the rocks.
- Safer to use - prevents any accidental injuries from users being able to come into contact with the hot surfaces of the heater
- More energy efficient
